

FUNDAMENTALS OF PALLIATIVE CARE

SEPTEMBER 8TH, 2026—OCTOBER 13TH, 2026

5:00PM—8:00PM

This 6-week standardized curriculum is based on 'A Model to Guide Hospice Palliative Care, 2002,' with a focus on Domains of Issues Associated with Illness and Bereavement. The learner will have the ability to influence the illness experiences for the person and family:

NOW ON BRIGHTSPACE TO BETTER SUPPORT STUDENTS!

The Fundamentals of Hospice Palliative Care is a prerequisite course for **CAPCE** (Comprehensive Advanced Palliative Care Education for RNS & RPNs) & **APPS** (Advanced Practice Palliative Skills for PSWs & Health Care Aides)

Course Outcomes

1. Demonstrates sensitivity, understanding and respect for the individuality of the person, family and team/caregivers involved in the palliative experience.
2. Observes issues associated with illness and bereavement.
3. Effectively communicates with the person, family and team.
1. Recognizes and reports changes in any of the domains of issues associated with illness and bereavement (i.e. disease management, physical, psychological, loss/grief, social and practical, end of life/death management, and spiritual).
2. Provides palliative supportive care strategies.
3. Actively contributes to the team approach to hospice palliative care.
